

Boost your Bottom Line and Productivity with LED lighting

Secure your ROI with Energy Makeovers

Since 2008, Energy Makeovers has been helping over 250,000 households and businesses save energy, time and money through the installation of energy saving equipment. With deep experience in partnering with businesses and governments to manage and deliver LED lighting upgrades, Energy Makeovers has developed processes to ensure that clients can enjoy a trusted relationship, top quality products and installations with minimum hassle. In addition, as part of a select few businesses operating in the Victorian Energy Saver Incentive scheme that are accredited for commercial lighting upgrades, Energy Makeovers is able to significantly subsidize the cost of the upgrade, further improving the return on investment for clients.

Case Study – greener, better lighting for Cardinia Life users

Cardinia Shire Council partnered with Energy Makeovers to upgrade the lighting at its premier health and recreational facility, Cardinia Life, an extensive facility including two indoor stadiums with more 800,000 visitors annually, and the council's largest single source of carbon emissions.

As part of the council's environmental upgrade program, Energy Makeovers upgraded hundreds of metal halide highbay lights, fluorescent tubes and halogen downlights with handpicked energy efficient LED products. With substantially longer service lives, these lights result in much lower ongoing maintenance costs as well as electricity costs. To further accelerate the savings, a sophisticated lighting control system was designed and installed to increase the use of natural light while maintaining consistent light levels. This combination of benefits, together with Energy Makeovers' ability to provide subsidies through the Victorian Energy Saver Incentive scheme, meant that the upgrade would pay for itself in less 2 years.

“Changing to LED lighting and installing a ‘daylight harvesting system’ has reduced lighting costs by more than 50 per cent”

--- Cardinia Shire Council Environment Officer Brett Munckton
