

Rollease Acmeda

CASE STUDY

Annual Savings
\$188,000+

190,000+ kwh
saved per year

Warehouse,
showroom + offices

Number of LEDs
499

An LED upgrade for this leading manufacturer

Rollease are innovators in precision window covering hardware systems, machinery and automated shade solutions. Their Melbourne headquarters decided it was time their lighting matched the high-standard of their brand and products.

Rollease partnered with Energy Makeovers to upgrade their metal halide **highbays, display shoplights, fluorescent tubes and panels.**

The challenge and the solution

Energy Makeovers were able to supply a diverse range of high-quality LEDs for all of the locations that Rollease needed to upgrade. Throughout the showroom, offices, warehouse and storage areas; we completed the work quickly and with minimal disruption to staff and work areas.

It's incredible the difference that upgrading lights can have on your energy needs and bills. Now Rollease have upgraded almost 500 lights they'll see a whopping \$200,000 of savings over 5 years and may never have to replace any 'blown' lights again!

Warehouse + offices

1,620 LEDs installed

\$200,000+ in 5 year savings

823 barrels of oil left in the ground

9,074 tree seedlings planted

58 homes powered

354 tonnes of greenhouse gases saved

129 cars off the road
