

# Toy Kingdom, Melbourne

# CASE STUDY

Annual Savings  
\$14,744.36

1,200+ tonnes  
of CO2 abated

1 Store  
upgraded

Number of LEDs  
59

## Toy Kingdom reigns over savings

Based in Melbourne, Toy Kingdom understands the value that quality lighting adds to their business. They want their customers to feel welcome and comfortable in their store whilst displaying their products in the best light.

So Toy Kingdom made the decision; it was time to move to LED. They selected Energy Makeovers to complete their LED upgrade and we were ready for the challenge.

## The Challenge and the solution

With a busy store Toy Kingdom needed as little disruption to their business as possible. Energy Makeovers came in and completed the installation quickly and quietly. During the project 59 lights were upgraded which created 1,263 VEECs and tonnes of abated carbon.

The best part is that Toy Kingdom can now expect to see savings of \$14,744 a year or \$73,721 over 5 years!

**1** Store upgraded

**59** Lights installed

**\$14,744** in annual savings

What this means...

294 barrels of oil left in the ground

3,238 tree seedlings planted

126 tonnes of greenhouse gases saved

46 cars off the road
